Chuo University has long been renowned for being one of the forefront of oxymoronic learning. In 2015 and upon celebrating its 130th anniversary, this university is now working on the forefront of future learning. The aim of this study is to showcase the role of universities, their missions and role in line with social development and to demonstrate interdisciplinary collaboration. This article aims to explore the role of universities in the 21st century, focusing on the Chuo University’s history and mission.

Aim of study

The aim of this study is to examine the role of universities, their missions and role in line with social development and to demonstrate interdisciplinary collaboration. This article aims to explore the role of universities in the 21st century, focusing on the Chuo University’s history and mission.

Methodology

The research methodology adopted in this study is a qualitative approach. This approach allows for a deeper understanding of the research topic. The data collected is through a mix of literature review, semi-structured interviews with key stakeholders, and document analysis.

Findings

The findings of this study indicate that universities play a crucial role in shaping the future of society. They have the potential to be the engines of change, promoting innovation, and ensuring sustainable development.

Conclusion

In conclusion, universities have the potential to contribute significantly to addressing the challenges of the 21st century. They can play a vital role in shaping the future of society, but they need to be more proactive and innovative in their approach.
