Avome Carabi University @Benin

- University of Abomey-Calavi (Université d'Abomey-Calavi Abomey-Calavi) is Benin's largest national university in the capital city of Cotonou.
- The university consists of 19 facilities and 6 campuses.
- Established as Dahomey University in 1970 and renamed Benin National University in 1975. The name was changed to the current name in 2001.
- More than 80% of the students are in the liberal arts department (economics, politics, law, politics, etc.), but the current president has announced that the entire country will make every effort to improve science and engineering departments and develop human resources in the future, with the aim of developing the nation's industries.
- Sophia University has concluded an agreement on student exchange as an agreed school with Japan, but in Benin, the Faculty of Science and Engineering of Chuo University is the first example of an agreement related to research and education.

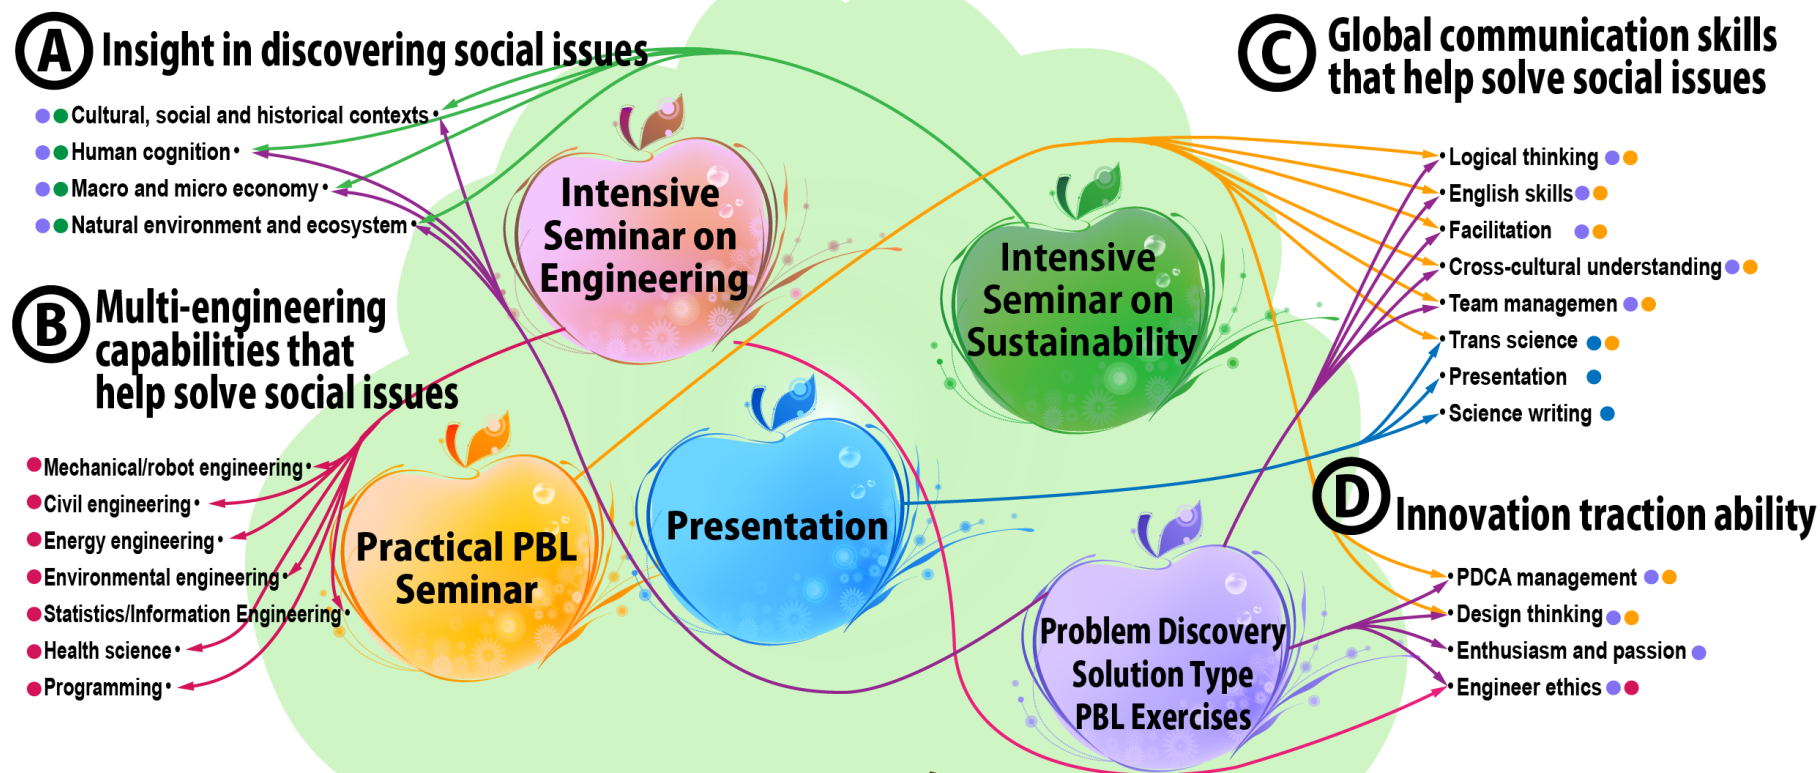

Prospect of exchange

Cultivation Program of Capacity Building in Transformative Science and Engineering

Objectives

- Cultivation of professionals with an innovation mindset who can propose new ideas based on free discovery
- Cultivation of object-oriented leaders who can master science and engineering as tools

Establishment of SDGs Education and Research Center in West Africa

What is transformative human resources??

Issues

Who leads the "era of remodeling"-

"transformative" personnel => "changing the world"

What is a transformative human resource...

Charisma? Savior? Steve Jobs? Masayoshi Son? Toru Hashimoto?

Many, small leaders should be the power to change the world!!

Element 1: Training in a small organization to overcome pressure

Generations in the process of disassembling "collective organizations" and transforming them into "individual collaboration"

Company's affiliation
Relatives

Venture, NPO
New in-house business

With the emergence of many leaders, and when that leader takes on the challenge, the pressure will be created.

Element 2: Challenge ideas (hypotheses), fail, and try everything

Increasing the number of "weak straps" to reduce information redundancy and encourage ideas

Element 3: Cloud peers sharing objectives

Create a weird association that connects with common challenges and topics.

I don't forget my mind.

Human resources with a foundation for innovation and a venture mindset that can implement it

[Output4] Unitization as
"Global Internship"

Model of Capacity Building in Transformative Science and Engineering

[Output5] Institutionalization of
"double degree program"

Japan

 Chuo University

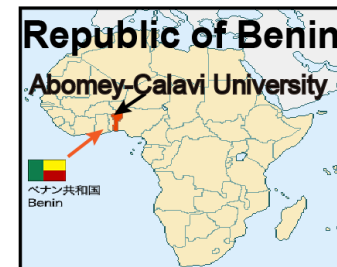

6 students/year

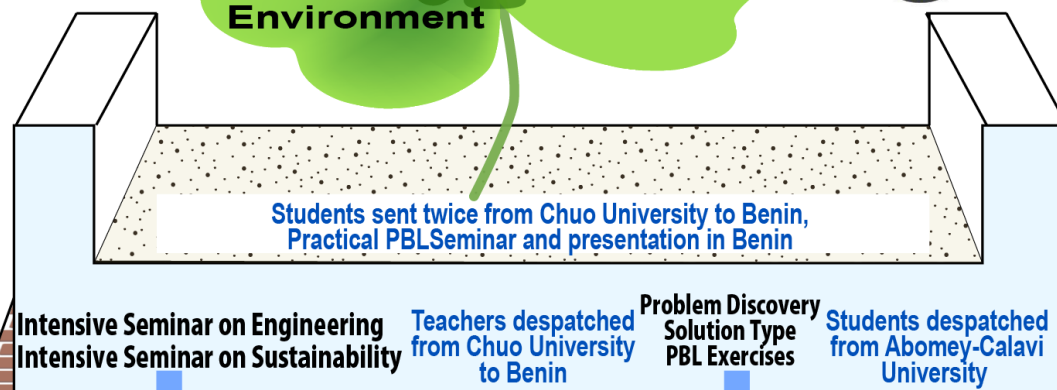

Republic of Benin

Abomey-Calavi University

8 students/year

[Output1] "Global PBL Basic Subjects"
Textbook + VTR on demand

[Output2] "Global PBL technique"
Workbook + On-demand VTR

Engineering ethics education Lectures in Benin supported by Institution of Professional Engineers, Chuo University and sponsor companies

[Output3] On-demand VTR

Japan side supports

- Embassy of Benin in Japan
- Institution of Professional Engineers, Chuo University
- Association of consultants
- NEC etc.

Benin side supports

- Takeshi Japanese Language School
- Benin Ministry of Foreign Affairs
- Benin Ministry of Education etc.

Achievements between Chuo University and Benin

Ambassador Speech

Research Seminar

Collaborative research

Contracted Agreement

Target area of Chuo University

I want you to actively jump into the chance (opportunity) of taking on the challenge of changing the world from among the students.

With your "technology" and "ideas" in African countries

I am waiting for the investment of "Challenge."
